MIG200L PRO DUAL PULSE

Magnum Welders Pty Ltd are the Professionals in welders and plasma cutters. We specialise **ONLY** in **Magnum** welders and plasma cutters and source the most reliable and best quality available.

COMING - MID AUGUST

The MIG200L PRO is a LCD screen Dual Pulse MIG welder. With minimalist style screen and control system, it shows everything you need, no matter your welding skill level. The new function **Synergy*** allows you to weld like a PRO. Double pulse and Single pulse, idea for aluminium welding. Pulse duty and pulse cycles, selective material, it ensures you reach welding perfection. Gas & Gasless MIG no matter the job. The MIG200L is an ideal machine for DIY, automotive, industrial and general fabrication, repair and maintenance. This is a must have, perfect for the PRO welder or beginners alike.

FEATURES:

- Possessing **Synergy*** control, Gas & Gasless MIG, Double Pulse & Single Pulse MIG, LIFT TIG, MMA functions.
- 3 step **Synergy*** function, easy for beginner welders.
- Single wheel wire feed with geared rollers.
- Duty cycle @ 40° C - 60% @ 200amps.
- Can take a 5kg roll of wire.
- Standard wire diameter 0.8/0.9/1.0/1.2mm.
- Smart matching for plate thickness and current in Lift TIG and MMA mode.
- Auto fan, only activated when welding.
- Double & Single pulse function, works perfectly for aluminum welding.
- Minor voltage adjustments to control penetration and avoid burn back.
- Adjustable inductance, pulse frequency, pulse duty cycle peak and base feeding.
- Full colour LCD screen with easy navigation.
- Ability to have up to 18 saved memory settings.
- Portable weight, only 15KG.
- Independent air flow design to protect important components from metal and dust particles.

WHAT IS SYNERGY:

You can select the material, thickness and the wire diameter, then you can start your welding, the machine will recommend the welding current, voltage and the wire speed for you. You can also adjust them manually yourself according to your welding needs.
