TIG200L PRO AC/DC

Magnum Welders Pty Ltd are the Professionals in welders and plasma cutters. We specialise **ONLY** in **Magnum** welders and plasma cutters and source the most reliable and best quality available.

COMING - MID AUGUST

The TIG200L PRO is a LCD screen AC/DC TIG Welder. With minimalist style screen and control system it shows everything you need, no matter your welding skill level. The new function **Synergy*** allows you weld like a PRO. Six wave form options on AC mode, LCD panel or remote control method. Controllable parameters include pre-gas time, post-gas time, start current, up slope and down slope time, end current level etc. It ensures you can reach welding perfection. The TIG200L AC/DC is an Ideal machine for DIY, automotive, industrial and general fabrication, repair and maintenance. This is a must have, perfect for the PRO welder or beginners alike.

FEATURES:

- **Synergy*** function, high frequency AC/DC TIG, lift TIG and MMA.
- 3 step **Synergy*** function, easy for beginner welders.
- Using IGBT tube from Infineon Germany, which provides stable and durable performance.
- Full colour LCD screen with easy navigation.
- Extraordinary 6 AC wave forms, provide different welding performances for thin plate or deep penetration.
- Auto fan, only activated when welding.
- Remote control function with standard remote torch.
- Ability to have up to 18 saved memory settings.
- MMA mode: hot start, arc force and current adjustments, VRD functions available.
- DC HF-TIG mode: start current, up-slope, peak current, pulse duty, pulse frequency, base current, down slope, crater current, post gas adjust available.
- AC TIG mode: AC balance, AC frequency, AC wave, pulse mode adjust available.
- Welding thickness from 0.5-5mm.
- Duty cycle @ 25° C - 60% @ 200amps
- Duty cycle @ 40° C - 40% @ 200amps
- Auto overheat, over current protection.
- Portable weight with only 15KG.
- Independent air flow design to protect important components from metal and dust particles.

WHAT IS SYNERGY:

You can select the material, thickness, then you can start your welding, the machine will recommend the welding current for you. You can also adjust them manually yourself according to your welding needs.
